

AASA 2010 National Conference on Education – Showcase Session Phoenix, Arizona February 11-13, 2010

Response to Intervention as an Organizing Framework: Who, What, Why and How

> Brenda LeBrasse, Executive Director, Instructional Services and RtI Colorado Springs School District 11 Colorado Springs, Colorado

Session Objectives

- ~ A Beginning Look at Applying an RtI Framework/Establishing the Urgency
- ~ RtI Across Levels of a System-Specific RtI Efforts in Elementary And Secondary Schools
- ~ Components to Successful Implementation of the RtI Framework in a District
- ~ Professional Development/Data Management/Funding/Systems Change
- ~ Results/Next Steps

Success for ALL Students

Response to Intervention:

Response to Instruction

Framework to Increase Student Learning and Close the Gap

RTI Action Network Definition of RTI

RTI is a multi-tiered, collaborative approach to providing academic and behavioral supports to struggling learners a t increasing levels of intensity. RTI can be used for making decisions about general, compensatory and special education, resulting in a wellintegrated and seamless system of instruction and intervention directed by student outcome data and matched to student needs. It has the potential to limit the amount of academic failure that any student experiences and to increase the accuracy and relevance of special education evaluations.

Background

- •2004 IDEA* and NCLB* authorizes RtI
- •The Exceptional Children's Educational Act (effective December 30, 2007) requires a plan describing how the revised SLD* criteria within an RtI model will be implemented.
- School District 11 Board policy adopted Sept 2008
- Colorado mandates beginning Aug 2009

^{*}Individuals with Disabilities Education Act

^{*}No Child Left Behind

^{*}Specific Learning Disabilities

RtI History

- Increased concern about the continuing rise in the number of students identified as learning disabled.
- 2001 U.S. Department of Education the Response to Intervention process was endorsed to identify and address learning needs in students as early as possible in their educational experience.

RtI History

- Congress passed the Individuals with Disabilities Act of 2004 authorizing local educational agencies to use RtI.
- A multi-tiered intervention option is recommended as a means to integrate educational problem-solving across educational levels, consistent with IDEA and NCLB and scientific research.
- Discrepancy Formula disappears as of August 15, 2009.

RtI Timeline for School District 11

Fixsen, D., Naoom, S., Blase, K., & Wallace, F. (2007, Winter/Spring). Implementation:

The missing link between research and practice. The APSAC Advisor, pp. 4–10.

RtI DO

The District Will:

3. Provide Ongoing Professional Development

1. Develop Pilot Exemplar Sites

2. Determine Research
Based Interventions and
Instructional Best Practices

RtI: DO

4. Ensure Fidelity

8. Identify Appropriate Resources

5. Identify
Dynamic Pyramid
of Interventions

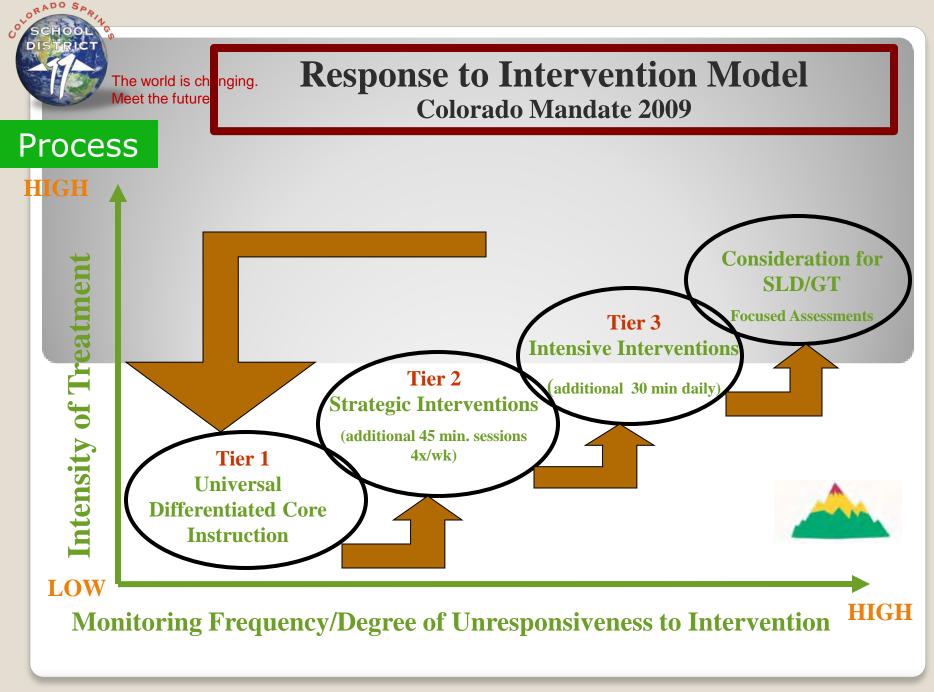

7. Identify
Appropriate
Assessments

6. Create a
District
Leadership
Team

9. Set Goal Team/PLC Expectations

Six Major Components

Leadership

Curriculum and Instruction

School Climate and Culture

Problem Solving Process

Assessment and Use of Data

Family and Community Involvement

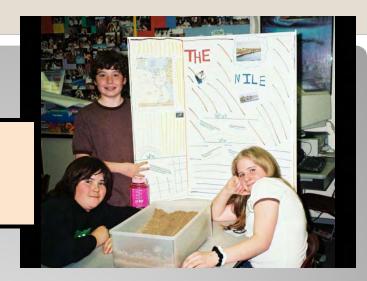

(1.0 Leadership)

- Principals and District Leadership understand & embrace the essential components
- Prioritize resource allocation to support the effort
- Guide the implementation through significant systemic changes
- Provide professional development
- Establish a long term commitment of resources and time

Curriculum & Instruction

(2.0 Strategic Planning)

- A three-tiered system designed to meet the needs of ALL students
- Curriculum based on state standards
- Researched based high quality instruction

School Climate & Culture

(5.0 Human Resource Focus)

- Positive school climate
 - Respectful & responsible behaviors actively taught & encouraged
 - Continuum of PBS available to all students
 - Displays of appropriate social behavior are more likely
 - Rates of rule violating behavior minimized
 - Academic engagement & achievement maximized

Positive Behavior Approach (PBS)

(5.0 Human Resource Focus)

- School-wide common approach to discipline
- Positively stated expectations for all students and staff
- Procedures for teaching expectations to students
- A continuum of procedures for encouraging demonstration and maintenance of these expectations
- A continuum of procedures for discouraging rule-violating behavior
- Procedures for monitoring and evaluating the effectiveness of the discipline system on a regular and frequent basis

Problem Solving Process

(6.0 Process Management)

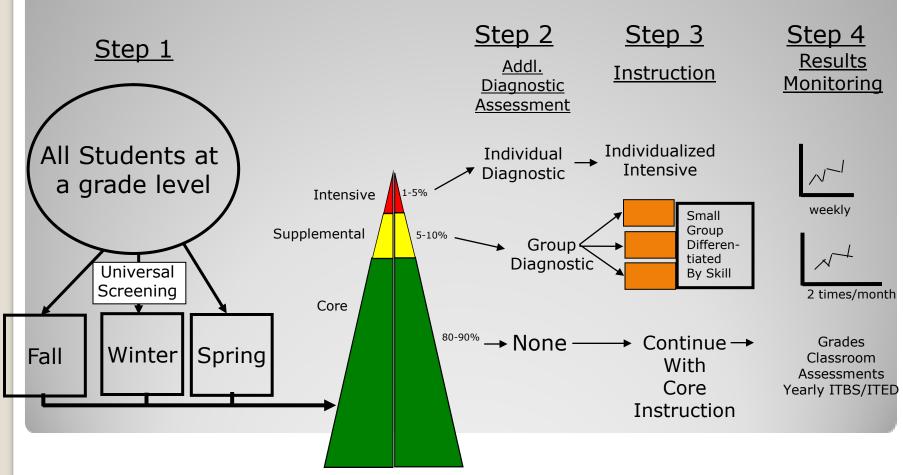

- Develop academic and behavior intervention strategies
- Ensure that interventions are implemented with fidelity
- Full collaboration among a team of professionals along with parents
- Use of data to guide decisions and frequently monitor progress

- Identify academic and behavioral needs of individual students
- Inform the problem-solving process
- Design and modify instruction to meet student needs
- Evaluate the effectiveness of instruction at different levels of the system

Assessment and Use of Data

How Does it Fit Together? Group-Level Diagnostic Std. Treatment Protocol

RtI Assessment and Progress Monitoring Guidelines

	UNIVERSAL SCREENING/BENCHMARK ASSESSMENT
WHO	All Students
WHEN	Three times per year (Fall, Winter, Spring)
HOW	MAP, DIBELS***
WHY	Assess student progress against national norms for grade level. Assess percentage of students meeting benchmark (target = 85%). Identify students at-risk for academic difficulties or who have exceeded benchmarks and need additional challenge.
DOCUMENT	Classroom differentiation strategies and adjustments to instruction to meet the needs of all students. Additional data (CSAP, classroom evidence) to support Tier II supplemental instruction via standard protocol for underachieving students.
ANALYZE	Determine if there is a significant gap based on data points.

	PROGRESS MONITORING				
	TIER I	TIER II	TIER III*		
WHO	All Students	Students not progressing at Tier I	Students not progressing at Tier II*		
WHAT IS MONITORED	Core curriculum and instruction with research-based universal supports. Examples: Differentiated instruction, flexible grouping, enrichment, additional help	Supplemental instruction using research- based strategies and interventions (small groups). Examples: SuccessMaker, Orton Gillingham, EDUSS, Language!	Intensive support for specific skill deficits (one-on-one or small group). Examples: Lindamood Bell, Corrective Reading/Math, ELL Services, Independent Study		
WHEN	As appropriate with instruction	At least 2 times per month at instructional level**	1 or more times per week at instructional level**		
HOW	Content/Skill Assessment, CBMs, DIBBLs (K-3), MAP	AIMSWeb, Intervention Central, CBMs, Intervention-embedded monitoring tools, Focused Assessments, DIBELs, TOWRE, STAR	AIMSWeb, Intervention Central, CBMs, Intervention-embedded monitoring tools, Focused Assessments, DIBELs, TOWRE, STAR		
WHY	Assess student understanding of concepts taught and use data to inform instruction.	Determine if intervention is addressing concern and student is moving towards goal.	Determine if intervention is addressing concern and student is moving towards goal.		
DOCUMENT	For struggling students: Area of concern, strategies used, progress. Chart individual student results vs. class average (all students may be on one chart).	For each student: Chart results and trend over time. Examine gap to reach goal or benchmark. Note any changes in intervention intensity, duration, frequency and/or group size.	For each student: Chart results and trend over time. Examine gap to reach goal or benchmark. Note any changes in intervention intensity, duration, frequency and/or group size.		
ANALYZE	Determine if there is a gap based on data points. Continue or change strategy? Move to Tier II?	How many data points are above/below goal line? Based on data points, is the gap closing?	Based on data points, is the gap closing? Consider diagnostic/prescriptive assessments?		

^{*}Tier III student assignment must be determined by the Problem Solving Team unless student already has an IEP.

^{**}All Tier II and Tier III students will be progress monitored at grade level once a month.

^{****}In secondary, if student is below proficient in MAP, follow-up with TOWRE testing.

- Sharing information
- Problem-solving
- Celebrating student success

Central to effective partnership is the recognition of shared responsibility and shared ownership of student challenges and successes.

Family & Community Involvement

(3.0 Student Stakeholder Focus)

Colorado Multi-Tiered Model of Instruction & Intervention

Intensive Level

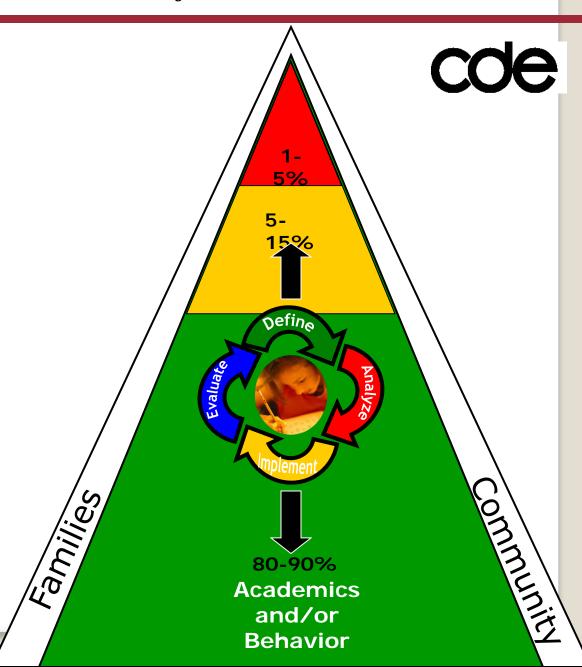

Interventions provided to students with intensive/chronic academic and/or behavior needs

Strategic Level

Interventions provided to students identified as at-risk of academic and/or social challenges who require specific supports to make adequate progress in general education

Universal Level

ALL students receive research based, high quality, general education that incorporates ongoing universal screening, progress monitoring, and prescriptive assessment to design instruction. Expectations which are taught, reinforced, and monitored in all settings by all adults. Discipline and other data inform the design of interventions that are preventive and proactive.

TIER I: UNIVERSAL CORE CURRICULUM INSTRUCTION

Focus All students grades 6 - 12

Program Scientific-based instruction and curriculum emphasizing mastery of content standards

Grouping Differentiated Instruction w/ flexible grouping

Time 60 minutes per day

Assessment Baseline Spring CSAP & NWEA-MAP Tests (Measures of Academic Progress), Quarterly & Short-Cycle Assessments

Interventionist General education teacher

Setting General education classroom

Classroom Teacher's Guide to RtI and Progress Monitoring TIER I

	Step 1	Step 2	Step 3
	UNIVERSAL CLASSROOM	CLASSROOM TIER I INTERVENTIONS	GATHER AND ANALYZE STUDENT DATA
wно	All Students	Struggling (or advanced) students	Students not progressing at Tier I
WHY	General education classroom instruction meets the needs of 80% of students.	General education classroom teacher provides classroom supports to improve student progress.	General education classroom teacher uses data to identify specific skill deficits.
WHAT IS DONE	Universal instruction using standards- based curriculum, research-based instructional strategies and classroom differentiation strategies to meet the needs of all students	Small group instruction, curriculum modification, re-teaching, enrichment, additional help, other differentiation strategies	Hypothesize cause for lack of student progress as suggested by error analysis of work samples and multiple data points.
HOW ASSESSED	Universal screening (MAP, DIBELS) 3 times a year; Quizzes, unit tests, as appropriate with instruction	Monitor progress via quizzes, unit tests, DIBELs, probes or CBMs (AIMSWeb), as appropriate with instruction or intervention.	Analyze student work, quizzes, unit tests, DIBELs, probes or CBMs (AIMSWeb).
ву whom	General education classroom teacher	General education classroom teacher	General education classroom teacher
DOCUMENT	Instructional strategies; student results (grade book)	Individual student concerns and Tier I strategies.	Areas of concern, results of analysis, next steps in the RtI Learning Plan in EASy
ANALYZE	Identify students who are not achieving at projected academic skill potential (including advanced learners).	Chart individual student results and monitor progress relative to benchmark proficiency standards.	Review other student work to identify trends Analyze student universal screening data by strand or skill Use Gap Analysis on benchmark data Gather data on skills of concern vs. national norms
NEXT STEPS	Implement Tier I intervention in the classroom for students who are struggling or not sufficiently challenged.	Gather and analyze data for students who are not making sufficient progress.	Consult with grade level team and building specialists Consider standard protocol intervention For complex situations, refer to Problem Solving Team

Ti Other Integrative	2)		

Comparison of RtI Approaches

A comprehensive school-wide RtI framework includes multiple approaches to providing early intervention for students who are struggling or advanced and not sufficiently challenged. Interventions begin in the classroom at Tier I. Students not progressing can move to Tier II through two options: 1) standard protocol interventions selected by the school to address multiple students' needs, or 2) the problem solving approach, which is most effective for students with multiple skill deficiencies or complex situations.

	Standard Protocol	Problem Solving				
Universal Screening	All students are assessed three times a year (fall, winter, spring) via MAP. Literacy assessment tools (DIBELS, TOWRE, SRI) are used to identify student progress against national norms for grade level.					
Tier I	All students receive high-quality standards-based core curriculum and instruction. Struggling and advanced students are provided classroom supports in general education classes and their progress is monitored.					
Tier II	Students whose universal screening and classroom (Tier I) data indicate that progress is not adequate receive targeted supplemental instruction in the area of skill deficiency. School or grade level teams review student data and recommend standard protocol interventions outside the Problem Solving Team. A minimum of four (4) data points (universal screening and classroom data) are recommended to make a standard protocol referral. 1. Students with similar needs are presented with one standard, research-validated intervention. 2. The intervention may address multiple skill sets and is delivered with fidelity. 3. Individual student goals are established. Progress is monitored 1-2 times per month; results are charted and trended over time. a. Four to six (4-6) consecutive data points below goal line: add or change intervention. b. Six (6) consecutive data points above goal line: set a different goal or reassess to grade level norms. c. Students not making progress after 4 to 6 data points at multiple interventions should be referred to the Problem Solving Team.	Students whose progress in Tier I is not adequate receive supplemental instruction targeted at specific skill deficits. Students referred to the Problem Solving Team typically have more complex problems requiring analysis and consultation with a variety of building specialists. 1. A team makes instructional decisions based on an individual student's performance. The team reviews universal screening, standardized test and classroom (Tier I) data; identifies the academic problem; determines its probable cause; and then develops, implements and monitors a plan to address the problem. 2. Students are presented with a variety of interventions, based on their unique needs and performance data. 3. Interventions are flexible and individualized to meet a student's needs and are delivered with fidelity. 4. Individual student goals are established. Progress is monitored at least 2 times per month; results are charted and trended over time. a. Four to six (4-6) consecutive data points below goal line: add or change intervention. b. Six (6) consecutive data points above goal line: set a different goal or reassess to grade level norms. 5. The Problem Solving Team regularly reviews intervention effectiveness and progress towards goals.				
Tier III		referred to the Problem Solving Team to determine if more g Team regularly reviews intervention effectiveness and				

TIER II: STRATEGIC INSTRUCTION

Focus	Students not proficient with Tier I efforts as documented by assessment
Program	Specialized, scientifically based program(s) targeting area of need and ability level.
Grouping	Homogeneous small group instruction (1:6 to 1:12)
Time	45 minutes per day in addition to regular 60 minutes of core instruction
Assessment	Progress monitored biweekly (or more) on target skill to ensure adequate progress
Interventionist	Classroom teacher, SPED teacher, specialized reading/math tutor, etc.)
Setting	May be the regular classroom, computer lab – dependent upon intervention & available resources

When Do Interventions Occur?

- Essential Skills
- Exploratory Periods
- Before/After School

TIER III: INTENSIVE INTERVENTION

Focus	Students with marked difficulties - have NOT responded adequately to Tier I and Tier II efforts
Program	Sustained, intensive, scientifically-based reading/math program(s) emphasizing the critical elements for students with difficulties or disabilities
Grouping	Homogeneous small group instruction (1:5)
Time	Minimum of two 30 - 45 minute sessions per day in addition to 60 minutes of core instruction.
Assessment	Weekly progress monitoring on target skill to ensure adequate progress and learning
Interventionist	Specialized personnel (SPED teacher, specialized reading/math teacher, school psychologist, etc.)
Setting	May be the regular classroom, computer lab – dependent upon intervention & available resources

Number of District 11 Schools with Initial, Progressing, Best Practice or Exemplar Rating in Implementing 3 of the 6 Components of RtI

The world is changing.
Meet the future.

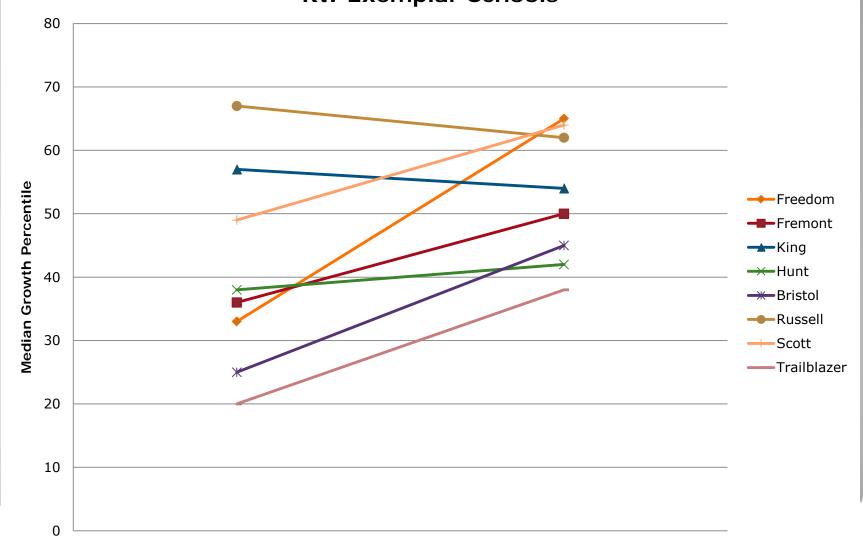

Out of 23 District 11 Schools, the number with Initial, Progressing, Best Practice or Exemplar Rating in PBS

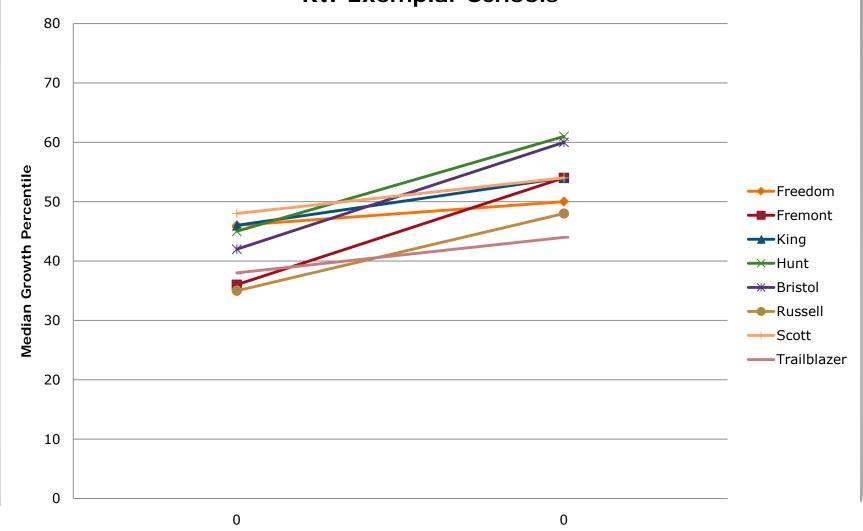

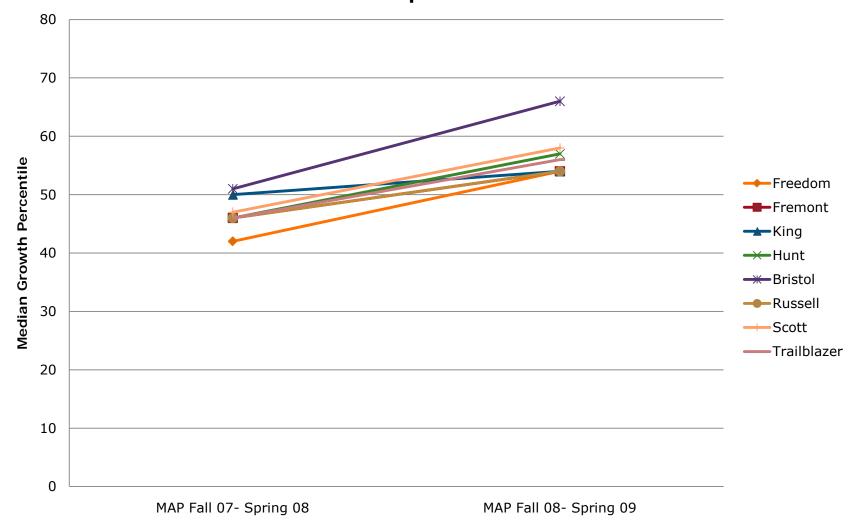

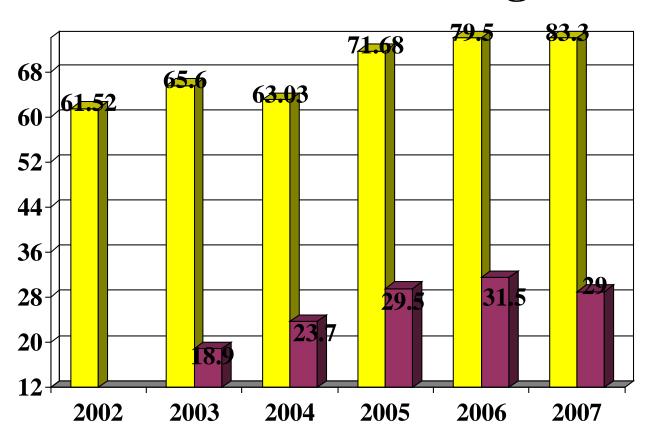

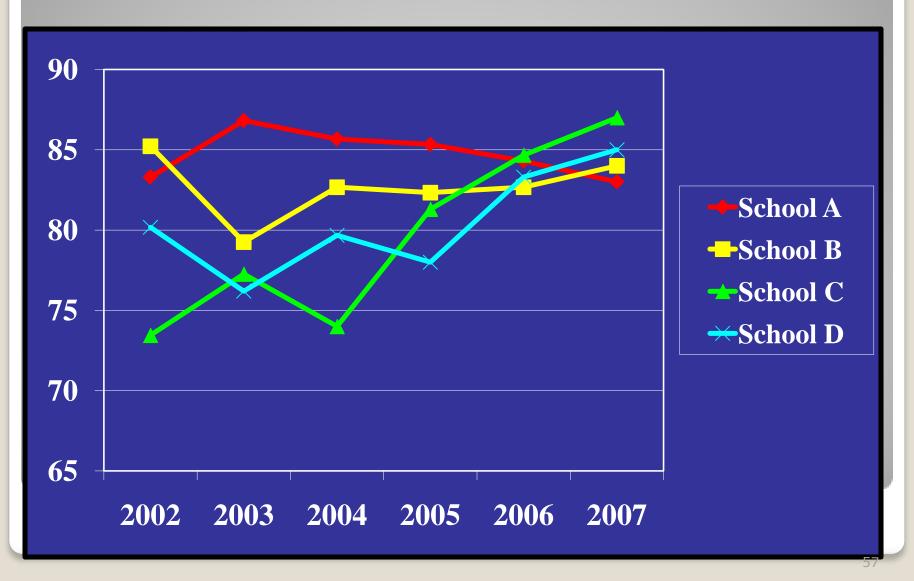

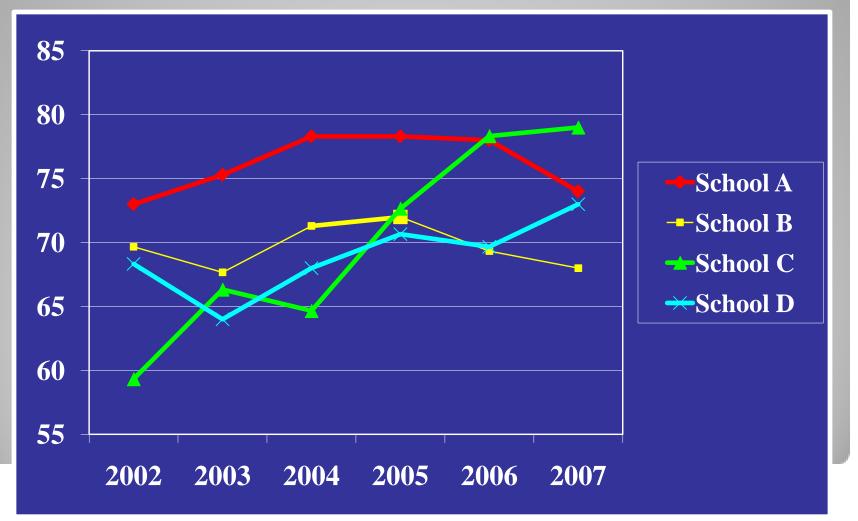

Holmes On Target for Achievement Average % P&A in Math and Reading/FRL

Average % P&A in Reading Compared to Area Middle Schools

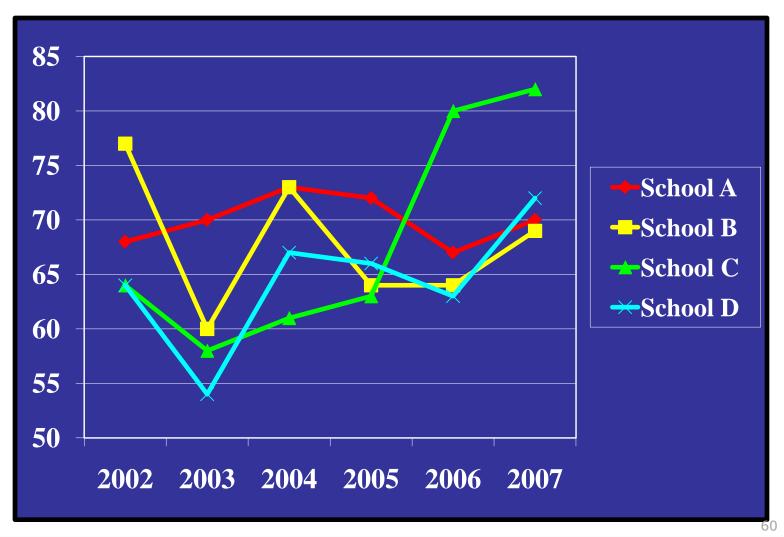

Average % P&A in Writing Compared to Area Middle Schools

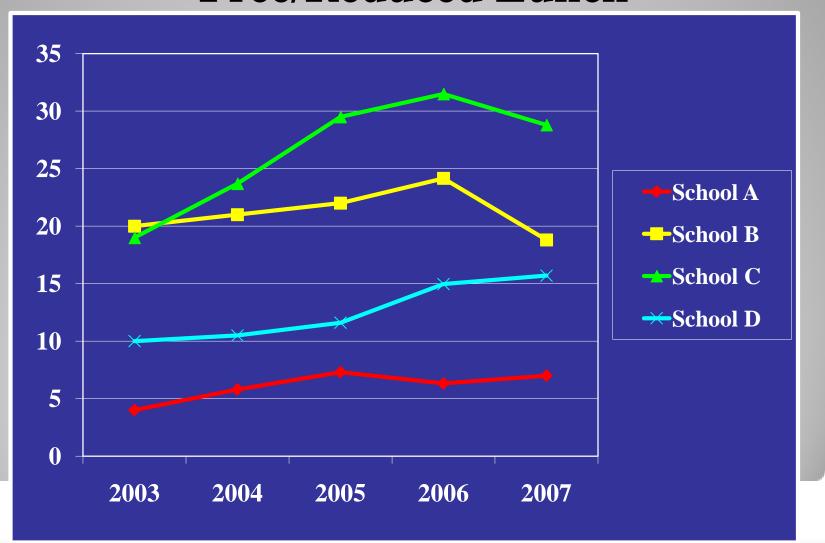

Average % P&A in Math Compared to Area Middle Schools

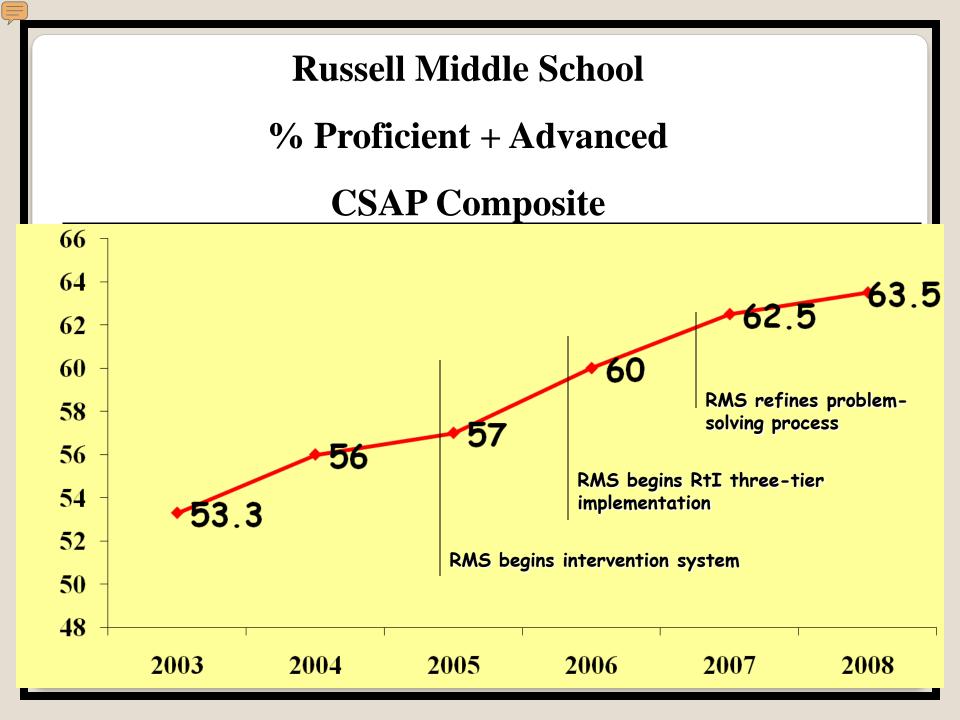

Average % P&A in Science Compared to Area Middle Schools

Percent of Students on Free/Reduced Lunch

Next Steps 2009-2010

Continue

- Training
- Coaching
- Facilitate sharing best practices
- School action plans

Refine tools

- Define best practice processes
- Adopt electronic RtI Plan and continue to refine electronic tools to support RtI and PBS
- Identify and fund effective interventions

Ongoing work

- Standard protocol interventions
- Progress monitoring
- Use of data
- Fidelity use of interventions
- Positive Behavior Support (PBS)
- Education and training

Additional Challenges

- Sustainability
- Differentiated Tier I instructional practices
- Training and use of benchmarking tools
- Progress monitoring
- Effectiveness of interventions
- Schedule and high school course credits
- Staff development

 Our goal in District 11 is to ensure that all children have access to high quality instruction and learning opportunities. Struggling learners (low achieving and gifted) are identified, supported and served early and effectively within the instructional framework Response to Intervention (RtI). Factors essential to the success of the RtI instructional framework require that teachers implement direct instruction and intervention with fidelity and consistency. Schools must implement essential components of RtI with fidelity consistent with critical program design featurés. Student progress is monitored in a systematic process to examine student achievement and the effectiveness of the curriculum.

> - Dr. Nicholas Gledich Superintendent, School District 11

Colorado Springs School District 11 21st Century Graduate

cademically Prepared

ulturally Competent

ighly Skilled Team Member

nnovat<mark>ive Thinker / Problem Solver</mark>

ffective, Efficient User of Information Technology

ital Participant in Civic Responsibility

If ective Communicator

We are committed to the GRADUATE

Every student prepared for a world yet to be imagined
